FRIDAY 20 MAY 2022

PINK SHIRT DAY

This Friday 20th May is a nationwide Pink Shirt Day. We will be holding a gold coin donation mufti day with all funds raised to go to the Mental Health Foundation. We encourage children to come dressed in something pink. If you don't have a gold coin donation please come dressed in uniform.

Recycling, Landfill

Did you know that birds and turtles die every day because people don't recycle their bottles or bags. Plastic bags can be traded for reusable bags. Recycling has so many benefits let me tell you.

*Collection!
After we finish using milk cartons we put it into the recycling bin with the yellow lid. Only recyclables with the number 1,2 are allowed in the yellow lid bin. If landfill items get put into the yellow lid bin all the plastic and recyclables go to landfill. The recycling Truck comes every Second Friday.*

*Sorting!
Once the recycling truck returns to the recycling centre it is now time for sorting. Now we put all the plastics onto the conveyor belt, Then a huge magnetic ball picks up all the metals and all the aluminium pieces. People sort out the hard plastics and the soft plastics by hand.*

The third step is compression. The recycling from the recycling centre gets compressed into bales then sold to companies to be made into something new!

With 97% of New Zealanders having access to facilities to recycle paper, glass, cans and plastics 1 and 2 (and in some places 1 - 7) we can, and must, do a lot better.

LUNCH BY LIBELLE FEAST WORKSHOPS

EVERY MONDAY THIS TERM A CLASS IS HAVING A LESSON WITH LIBELLE (OUR LUNCH PROVIDER) ON MAKING LUNCH!

LAST MONDAY WAS ROOM 7 MAKING WRAPS.

RECYCLING

Do you know what happens to your recycling? If you put 1 wrong thing in your recycling it all goes to landfill. Did you know if you recycle 1 aluminium can it will get turned into 20 aluminium cans. So I'm here to tell you what happens at the recycling centre!

The first step is collection. When I finish a bottle of milk I check if it has a number 1 or 2 on it. Every 2 Fridays I put out the bin with the yellow lid so it can be collected by the recycling truck. If you put 1 wrong thing in the recycling bin it either won't be collected or it will all go to landfill. Make sure you put the right things in the right bin.

The next step is sorting. When the recycling truck gets to the centre all of the rubbish gets put onto a conveyor belt together. Then coming up is a big moving magnet and it collects all of the metal and aluminium. The rest of the rubbish continues on the conveyor belt. Then some workers sort the rubbish into hard plastic and soft plastic.

The last step is pressing them down into bales. When all of the recycling is sorted they get pressed down into 1,000-1,500 pound bales. Then they sell them to other companies for \$800 dollars. The other companies clean, melt and shred them and make the recycling into new items.

Sadly New Zealand only recycles 58% of their recycling but hopefully you learnt something in this piece of writing!
