When STOP means STOP
Drivers occasionally fail to see the STOP sign at the corner of Anderson and Lincoln Streets. We all have to pay the penalty for our oversight. As I learned to my dismay recently, my slight moment of inattentiveness at this little gem of a corner was disturbed by the urgent flashing lights in my rearview mirror. Surely the \$150 fine and the 20 demerit points will ensure I don't end up at the school gate explaining my error to a very diligent policeman. I just wished he turned off those lights! YES STOP means STOP and this very well policed corner should be a warning not to get distracted, but stay in the moment.

GYMNASTICS

A couple of weeks ago a group of our students went to the Piako Gymnastics competition and competed in a range of gymnastics activities. All of the students had been practicing every lunch time for the past 8 weeks and did an amazing job at the competition. Our hip hop group was awesome walking away with first place, as well as a group of children who placed in the top 6 in their category making it through into the regional competition.

THE WAI *the water*

Rooms 1-5 have begun their learning about all things Wai (water) and have started exploring different scientific aspects of water and the water cycle.

Among the classes they have observed and gained insight into...

- what happens when water becomes ground water
- what naturally happens when water is both heated and cooled
- how salt water is turned into fresh water
- designing their own rain harvesters to explore whether or not rain water is fresh for drinking
