FOAMING & FIZZING

In Akomanga Whitu we continued the fizzing and foaming learning by making sherbert. We had some great helpers from Room 4 who showed us how to add icing sugar, jelly powder, baking soda and citric acid in a bowl. We used our five senses to explore the sherbert, finishing with taste and it was like an explosion in our mouths! The reaction doesn't happen until

the saliva in your mouth makes everything wet, so that the baking soda and citric acid can react to make the fizzing foam that leaves your mouth tingling.
